EDUCATION

Kirinyaga University Kutus, Kirinyaga
Bachelor of Science in Computer Science Sep. 2023 – Present

TECHNICAL SKILLS

- **Languages & Scripting:** Python, Bash / Shell Scripting, Go *(Learning)*, SQL (MySQL, SQLite3), JavaScript (DOM Manipulation), HTML/CSS
- **Frameworks & Libraries:** Flask, Bootstrap
- **DevOps & Tools:** Linux/Unix, Shell Automation, Git, Vim, Nvim, Terminal, VS Code

PROJECTS

Personal Backup System *Bash, Linux, Telegram API*

- Developed a robust backup system using Linux utilities (`tar`, `awk`, `du`) to automate data redundancy and system maintenance.
- Integrated Telegram Bot API for real-time status alerts and manifest logging to enable remote system monitoring.

Personal Workspace Improved *Python, Flask, SQLite3, Bootstrap, yt-dlp, FFmpeg, JS (DOM)*

- Built a full-stack dashboard using Flask and SQLite3 to centralize personal workspace tools and media management.
- Implemented `yt-dlp` and `FFmpeg` on the backend to handle asynchronous media fetching and transcoding.
- Integrated the TMDB API to automate metadata retrieval and cataloging for a custom movie library module.
- Deployed Vidnet and Videasy players for direct stream handling of library assets.
- Developed a responsive frontend using Bootstrap with client-side filtering and state management via DOM manipulation.

Personal Workspace *Python, Flask, SQLite3, Bootstrap, JavaScript*

- Developed a full-stack web application using the Flask framework with a responsive UI engineered using Bootstrap grid classes and custom CSS.
- Implemented client-side and server-side form validation to ensure data integrity prior to SQLite3 storage.
- Engineered backend CRUD operation logic for seamless management of user-generated content.
- Leveraged JavaScript DOM manipulation to build interactive UI components, enhancing overall user engagement.

RELEVANT COURSEWORK

Core Subjects: Data Structures & Algorithms, Database Management Systems (SQL), Operating Systems (Linux/Unix), Computer Networks, System Security, Web Development, Object-Oriented Programming (OOP).

TECHNICAL INTERESTS

DevOps & Cloud Infrastructure, Shell Scripting & Automation, Open Source Contribution, Cyber-security (Kali Linux).
